

MATH Unit 3 Previous Year Questions

Mathematics (MATH) · Unit 3 · Probability & Statistics · 2023

Questions collected from previous year university examinations (2019–2023).

Part A — Short answer (2 marks)

1. Illustrate Conditional Probability with a worked example. [2023]
2. Write short notes on Bayes' Theorem. [2021]
3. Define Random Variables. Derive or justify the key properties involved. [2021]
4. Compare Binomial and Poisson Distributions with Correlation and Regression. When would you prefer one over the other? [2020]

Part B — Long answer (10 marks)

1. Write short notes on Normal Distribution. [2020]
2. Discuss the role of Correlation and Regression in Probability & Statistics. [2022]
3. Discuss the role of Conditional Probability in Probability & Statistics. [2021]
4. What is meant by Bayes' Theorem? Discuss its advantages and limitations. [2021]
5. Explain Random Variables with a neat diagram and a suitable example. [2020]
6. Write short notes on Binomial and Poisson Distributions. [2020]
7. What is meant by Normal Distribution? Discuss its advantages and limitations. [2020]
8. Define Correlation and Regression. Derive or justify the key properties involved. [2021]
9. Write short notes on Conditional Probability. [2020]
10. Illustrate Bayes' Theorem with a worked example. [2022]
