

DBMS Unit 2 Question Bank — Relational Model & SQL

Database Management Systems (DBMS) · Unit 2 · Relational Model & SQL · 2025

Important and frequently asked questions, grouped by marks.

Part A — Short answer (2 marks)

1. What is meant by Relational Algebra? Discuss its advantages and limitations.
2. Define Joins. Derive or justify the key properties involved.
3. Discuss the role of Nested Queries in Relational Model & SQL.
4. Illustrate Aggregate Functions with a worked example.
5. Compare Views with Nested Queries. When would you prefer one over the other?
6. Write short notes on Integrity Constraints.

Part B — Long answer (10 marks)

1. Discuss the role of Relational Algebra in Relational Model & SQL.
2. Discuss the role of Joins in Relational Model & SQL.
3. Define Nested Queries. Derive or justify the key properties involved.
4. Define Aggregate Functions. Derive or justify the key properties involved.
5. Compare Views with Nested Queries. When would you prefer one over the other?
6. Define Integrity Constraints. Derive or justify the key properties involved.
7. Discuss the role of Relational Algebra in Relational Model & SQL.
8. Compare Joins with Views. When would you prefer one over the other?
9. Illustrate Nested Queries with a worked example.
10. What is meant by Aggregate Functions? Discuss its advantages and limitations.
11. Illustrate Views with a worked example.
12. Discuss the role of Integrity Constraints in Relational Model & SQL.
